The Impact of Low Testosterone on Clinical Well-being in the Male Patient

September 29, 2007 • 12:00 pm – 1:30 pm

Seaport World Trade Center

Harbor View Ballroom • Plaza Level

Boston, Massachusetts

Target Audience/Program Description:

Low testosterone has a significant impact on men's overall urologic health; however, it is largely unrecognized or acknowledged in medicine. This program will provide insight for urologists to identify the low testosterone patient and subsequently provide better clinical management.

Course Objectives:

Upon completion of this activity, the attendee should be able to:

- Evaluate and diagnose patients with suspected androgen deficiency
- Recite emerging scientific evidence regarding low testosterone and overall men's health
- Choose an appropriate therapy for those patients with diagnosed low testosterone

Acknowledgement

"The Impact of Low Testosterone on Clinical Well-being in the Male Patient" is supported by an unrestricted educational grant from Auxilium Pharmaceuticals, Inc.

Faculty

Andrew R. McCullough, MD, FACS

Associate Professor
