8:30 PM – 12:30 PM: Nonsuch Island Tour
12:30 PM: Depart Dockyards to the Fairmont

In 1951, the world’s scientific community was stunned by an announcement from a small island off the coast of Bermuda. The Cahow, a bird that was thought to have been extinct for more than 300 years, had been re-discovered on a 15-acre island called Nonsuch. This island became a global example of ecological restoration. Board the R/V Stommel, a 40’ research vessel, and take a 45 minute ride to Nonsuch Island. Once ashore, you will hear an introductory talk about the island’s history and then enjoy a tour of the various habitats on the island, with much discussion of the Cahow bird and its recovery from near extinction. Don’t forget to take advantage of the many photo opportunities and gorgeous scenery! You will end the walking tour at the beach dunes, where those who are brave enough are welcome to take a swim.

COST: $78.00 per person (Please note that a portion of this fee goes to the Nonsuch Island Preservation Fund)
Minimum of 12 guests/ Maximum of 24 guests

IMPORTANT: Access to the Island requires some agility. There are also several flights of stairs and the terrain is quite rough in places. Sneakers are suggested.
